

Objective: Ensure GitHub account is set up, Python and VS Code are installed correctly, practice verifying Python installation.

Tasks:

- Install Python on your laptop. (<https://www.python.org/downloads/>)
- Install Visual Studio Code (VS Code). (<https://code.visualstudio.com/>)
- Take a screenshot of success message of both installations. In case you have already installed both you can take screenshot of the installed VS code.

Verify Python Installation:

- Open your command line or terminal.
- Type `python --version` and press **Enter** to check the Python version.
- Take a screenshot of the output.

Set up a GitHub Account:

- Create a GitHub account if you don't have one. (<https://github.com/>)
- Take a screenshot of your GitHub profile.

Submission:

- Upload screenshots of the Python and VS Code installations, Python version verification, and your GitHub profile, to Google Classroom.
